OBJECTIVE

Engineering student with foundational knowledge of Backend Development . Skilled in Java, SpringBoot, APIs, and SQL, with internship experience on a Charging Software Management System developing backend logic, API integration, and database operations. Quick learner with strong problem-solving abilities, documentation skills, and a keen interest in enterprise IT operations and cloud support.

EDUCATION

Government College of Engineering Kalahandi,
B.Tech in Electrical Engineering (CGPA: 8.29)

2022 - 2026

EXPERIENCE

Head of Product

Dec 2025 – Present

Future Motion Pvt Ltd (@Karocharge)[link](#)

New Delhi (Remote)

- Engineered a **Spring Boot backend** for EV charging infrastructure including protocols, integrating **multiple Charging Software Management Systems (CSMS)** to control and **monitor 50+ real and virtual chargers**; built a real-time **admin dashboard** providing live network and station status visibility across the entire fleet.

SDE Intern

April 2026 – May 2026

HireKarma [link](#)

Bhubaneswar

- Contributed to backend development using **Python** and **FastAPI** , building scalable systems with clean architecture and real-world product features. Adopted AI-assisted development tools (**Cursor, v0, Antigravity**) to accelerate frontend development with Next.js, rapidly prototyping and shipping UI components.

PROJECTS

EV-SIM — Full-Stack EV Charging Simulation Platform ([GitHub Repo](#))

Jun 2026

- Built a full-stack EV charging simulator with virtual chargers communicating with a CSMS via **OCPP 2.0.1** over WebSocket, using **Python** (FastAPI) on the backend and **Next.js**, TypeScript, TailwindCSS on the frontend.

Fitness Tracker Application ([GitHub Repo](#))

Feb 2026

- Designed and made a full-stack fitness tracking system using **Java, Spring Boot**, and **Microservices architecture**. Implemented service discovery using Eureka, and containerized services using **Docker**. Integrated **SQL** for data management, secured APIs with authentication, and added **AI-based** insights using **Gemini API**.

SKILLS

Frontend: HTML, CSS, JavaScript

Databases: SQL

Backend: Java, Python, SpringBoot, APIs

Ai tools: Cursor, Claude, V0, Gemini, GPT

Version Control: Git, GitHub

DevOps: Docker, AWS

ACHIEVEMENTS

- Qualified TCS National Qualifier Test (NQT) 2026.
